

ギアアップテニスの第3回審査結果 020年3月27日 4:52

差出人: Apple

- 2.1 Performance: App Completeness
Guideline 2.1 - Performance - App Completeness

We found that your in-app purchase products exhibited one or more bugs when reviewed on iPad running iOS 13.4 on Wi-Fi.

- In-app purchase page wasn't displayed properly.

Next Steps

When validating receipts on your server, your server needs to be able to handle a production-signed app getting its receipts from Apple's test environment. The recommended approach is for your production server to always validate receipts against the production App Store first. If validation fails with the error code "Sandbox receipt used in production," you should validate against the test environment instead.

Resources

You can learn more about [testing in-app purchase products](#) in your development sandbox environment in App Store Connect Developer Help.

For more information on receipt validation, please see [What url should I use to verify my receipt?](#) in the In-App Purchase FAQ.

Learn how to [generate a receipt validation code](#) in App Store Connect Developer Help.
